
Integrated Management System Longworth

5.2 Environmental Policy Statement

Longworth Building Services Limited recognises that its activities have an impact on the environment in one form or another and it is therefore a Company objective to minimise the effects through having an effective Environmental Management System.

To achieve this objective the company has implemented an Environmental Management System that complies with the requirements of the international standard BS EN ISO 14001: 2015 and its adherence throughout the Company is mandatory.

Measures adopted for the implementation, maintenance, monitoring and improvement of the Environmental Management System include: -

- Complying with all relevant regulatory requirements and environmental legislation
- Working closely with customers and suppliers to ensure its service has a minimal environmental impact and maximises the opportunity for recycling waste.
- Engendering environmental awareness and vigilance in personnel at all levels within the company and taking appropriate corrective actions to reported problems and preventative actions to potential problems.
- Ensuring that all personnel understand their responsibilities with regard to the requirements of the Environmental Management System.
- A commitment to setting environmental objectives and targets to continually improve our environmental performance and prevent pollution.
- Making this policy available to the general public and potential and existing clients through conventional marketing methods and on the Company's web site.
- Considering the environmental impact when deciding on capital expenditure.
